To our Kids Therapy families:

We start by saying that we hope that your families are staying healthy and calm in the midst of COVID-19.

We would like to inform you at this time we will remain open and we are striving to continue to provide our same level of service to our families. We have taken extra precautions in the areas of sanitizing during open hours and implementing additional cleaning services when our clinic is closed. We currently have no known COVID-19 confirmed cases in our patients, families, or employees at our clinics and we will continue to closely monitor this and update accordingly.

We support whatever you feel is the best decision for your child and would like to keep you updated on policies that are currently in use at both of our clinics if you do choose to attend therapy including:

1. No waiting room policy: We are asking that you drop your child off at the front door and we will meet you there to take your child back to therapy. At the end of their session, we will bring your child outside to you. This will help to greatly minimize the spread of germs in our waiting room. If you attend your child's therapy session, we ask that you wash your hands before and after the session. Our therapists will work with you on this policy based on your child's specific needs.
2. We will be cleaning every toy or piece of equipment that is used in each therapy session and will discontinue use of toys that are not easily sanitized including tactile bins, play-doh, and large crash pillows for time being.
3. If you, your child, or any family members are sick at this time please use your best judgment and stay home or reach out to us with concerns. This includes fever, coughing, sore throat, and runny nose. Please refer to the CDC website <https://www.cdc.gov/> for further advisement.

Please contact our office or your therapist with any further concerns. We hope to continue to provide the highest level of services while maintaining a safe and clean environment for your children. We thank you for your cooperation and we continue to have the best interest of your child and family in mind.
