Health Policy

It is our policy that children are not to be in the clinic if they have any of the following:

- A temperature over 99 degrees. After any illness, temperature should be normal for 24 hours before the child returns to the clinic.
- Sore, red throat, earache or swollen glands.
- Any undiagnosed rash or skin eruption. Children cannot attend therapy with a rash unless we have a doctor's note informing us that the rash is not communicable.
- Nausea, vomiting, and/or diarrhea.
- Eyes that appear reddened and/or are crusted, unless we have a doctor's note that it is not a communicable conjunctivitis.
- Acts listless, drowsy, has a headache, appears flushed, has lack of appetite, or shows any behavior that is out of the ordinary.
- Is coughing, sniffing or has a runny nose with a green or yellow discharge. Many communicable diseases begin with these symptoms and are most contagious at this time.

If we observe any of the above symptoms in your child, we will ask you to bring him/her home. This is for the protection of your child, the other children at the clinic and the staff.

Minor injuries will be cared for by the therapist and you will be notified.

In case of an emergency, you will be notified immediately. If you leave the clinic while your child is in session, we ask that you leave a phone number where you can be reached. If the parents cannot be reached, we will contact the person on the emergency list, the doctor, or the hospital.

Please alert the therapists of any change in your child's health status such as allergies, diet or medication.
